The traffic reports in the Philadelphia area are inaccurate, untimely, and useless. It seems the reporters simply read a script at each prescribed interval, regardless of the actual traffic conditions. Each lawmaker should be required to listen to the accurate and useful trafic reports on XM, and compare them to commercial radio reports before rendering a vote on the issue.In addition to the issues of free speach, we also have the freedom of choice in America. It should not be removed by a few politicians with their pockets lined with lobyist's $$$.
